I found this book very useful when I was asked to do a research project during my OT level II fieldwork. I knew what type of experiment I wanted to do, but was having trouble with the statistical aspect of the project. This book did a nice job of explaining step by step how to chose your statistical test depending on your experimental design. It also walked you through step by step how to do the calculations. I had tried looking online for answers to my questions, but just became more confused. This book cleared things up for me very nicely.
