Very well organized and easy to follow format for kids.

By Monabee

Recently I bought several of Spectrum Math, Language Art, and Writing books for my son, so I will write one review and post it for all of them.

My son has ADHD and had a very hard time in school. I decided to homeschool him for one year so that he can get a better foundation and then go back to public school. I bought these books with the suggestion of an experienced homeschool mom. They have been great! I am very pleased with how organized and easy to follow these books are. I pretty much let my son read the instructions and answer the questions himself. He is

learning how to learn and his self-confidence is going up. Of course I am there to help him if he needs help, but the books are so well written and organized that he rarely has a question about the instructions or solving the problems in the book.

I highly recommend these books for kids that dislike learning, have learning disability, or like my son have ADD or ADHD.

Also, I bought couple of books (level 1 and level 2) titled "Building Thinking Skills" author Sandra Parks and Howard Black. These books are great tools for my son to help him to learn how to think logically to solve problem. I highly recommend them.

Perfect for homeschool or review, lots of practice, clear.

By LilTuscany

I homeschool and this book is in daily use at our home. I also got 7, and it's great too!

I highly recommend this to any homeschool parent. A great tool for making math easier..and yes it does contain the answers to make things easier for you.

McGraw-Hill's Math Grade 6 is better

By Kathryn L. Newton

I purchased Spectrum Math, Grade 6 and McGraw'Hill's Math Grade 6 at the same time and the McGraw-Hill's is better, but they both give a math student the extra practice to get comfortable with how to solve Math problems.
